Strategic Analysis

Shattering the Duopoly: The 2026 election ended the traditional two-pole rule. A third force (TVK+) has effectively cannibalized existing power blocks.

Cost of Every Vote: Competition has intensified. Winners are decided by smaller slices of the electorate, making every vote critical.

The Death of Standalone Wins: With only 2 out of 234 winners achieving a 50% majority, coalition-building is now a necessity.

Securing the public's trust and a significant vote is a commendable achievement for any single party.
